Job Description:

The Planetary Science Institute (PSI) is currently seeking an undergraduate student to conduct research on small bodies of the solar system, including analyzing astronomical images and numerical modeling with existing software.

The skills, knowledge, and minimum qualifications required for this position are as follows:

- Current undergraduate student specializing in planetary science, astronomy, physics or a related field. A current sophomore or junior is preferred as the project could last more than a year.
- Must be able to continue to work during the summer.
- Experience with astronomical image processing software is preferred.
- Prior research experience is desired, but not required.

Note: Management may assign or reassign duties and responsibilities to this job at any time. This description is intended to be generic in nature. It is not intended to determine specific duties and responsibilities of any particular position.

To apply for the position:

If you are interested in applying for this position and you meet the required qualifications for the opening, please submit the following documents to hr@psi.edu:

- A cover letter that addresses your interest and qualifications for this position.
- Resume, including transcripts.
- Completed Application and Voluntary Self-Identification form (can be found on www.psi.edu where this position is posted or by sending a request to hr@psi.edu).

PSI is an Equal Opportunity/Affirmative Action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law.
